Inflatable Trailer / vehicle

Hanweier provides integrated inflatable fire engine solutions for professional fire engine manufacturers. On the basis of existing vehicle base, Hanweier provides one-stop service from design, installation and commissioning.

Specializing in manufacturing high pressure filling pumps and related high pressure systems

Strong design team, to provide a full set of design schemes

Localization service, to provide quick after-sales service

The establishment of Shanghai factory, to provide quick spare parts supply

Through the ISO9000 quality system certification

The whole system is manufactured according to NFPA1901 standard

Provide integrated solutions

Design - can be designed according to your requirements of the entire vehicle-type filling system, truly suitable for your inflatable car, to achieve close integration with your system.

Manufacturing - can provide filling pumps of different flow levels, different types of filling systems and various accessories, to achieve one-stop procurement.

Installation - can provide skid mounted structure, also can provide modular construction, and provide the entire system of piping installation and commissioning, provide turnkey service.

Service - a strong after-sales service team, to provide you with professional technical support. Perfect spare parts inventory, to solve your worries.

Inflatable car system composition

High pressure air filling pump: 600L/min-2800L/min large flow filling pump is available. It can be driven by motor, diesel engine, or electric, diesel double drive, force extractor drive.

High flow breathing air filtration system: provides compressed air to meet the breathing standard EN12021.

Respiratory air storage system: available in 40L or 50L@35-40MPa cylinder sets, quantity can be selected according to vehicle size.

Automatic step type bottle filling control system (Hanweier patented design) : no human judgment, automatic step filling.

PLC control system: with Chinese operation interface, convenient for customers to use, maintenance, troubleshooting, and provide guidance for maintenance.

Explosion-proof inflatable box (hanweier patent design) : according to NFPA1901 standard design, can fill 2 to 8 carbon fiber bottles at the same time.

The whole inflating system adopts full automation design, as long as the start button is pressed, so the control functions are automatically realized, the operator only needs to replace the carbon fiber bottle to inflate.
